

Ideation Phase

Define the Problem Statements

Date	19 September 2022
Team ID	PNT2022TMID04713
Project Name	IoT Based Smart Crop Protection System for Agriculture
Maximum Marks	2 Marks

Customer Problem Statement Template:

The problem of demolishing crops causes a major threat to agriculture as well as to humans. This leads to the poor yield of crops and significant financial loss to the owners of the farmland. This project yields a monitoring procedure for farm safety against animal attacks and climate change conditions. IoT advances are frequently used in smart based crop protection to emphasize the standard of agriculture. The result will be generated and notifications will be sent to the person's mobile to take the necessary action.
